

Mold Inspection Agreement

Inspection Address: \_\_\_\_\_

How We Inspect

The Client has requested a limited visual inspection to identify the problem, cause and corrective action necessary for the specific mold or indoor air quality issue experienced. The inspection will conform to the standards of the IICRC (Institute of Inspection, Cleaning and Restoration Certification), and will include the following; moisture analysis, visual inspection of situation and surroundings, appropriate testing of affected areas, and review of applicable home systems affecting the situation. The evaluation will be based on observations that are primarily visual and non-invasive. The inspection and report are not intended to be technically exhaustive. Any additional samples taken to be evaluated by a laboratory and the associated add-on fees will be discussed with the client. Scott Home Inspection, LLC (Scott Home Inspection) will provide a written report that is a summary of observations and unbiased opinions based on the experience of the inspector. The inspection is not complete until the written report is received.

The Inspection Report outlines and defines the areas of the home that were inspected, as well as indicating any items that were not inspected, the reason they were not inspected, and general statements of what is commonly included and excluded during an inspection. The written Inspection Report, together with this agreement, represent the final statement on the condition of the home or building when inspected and the final statement on what was included and/or excluded in the inspection.

Scott Home Inspection and its employees or agents shall not be held liable for the cost of repairing any defects or deficiencies, whether present at the time of the inspection or arising in the future, or for any consequential property damage or bodily injury of any nature.
